Description

We are delighted to unveil the latest innovation in our aortic portfolio – The first off-the-shelf MDR CE mark approved single branch endoprosthesis. This device is designed to address the endovascular repair of all lesions of the descending thoracic aorta (including isolated lesions, such as aneurysm and traumatic transection, and Type B dissections) while maintaining flow into the left subclavian artery.

What makes it stand out is its off-the-shelf configuration allowing for a single procedure zone 2 intervention, resulting in a more efficient and streamlined procedure.

Objectives

- Learn more about the device from our Gore specialists
- Witness live demonstrations of the GORE® TAG® Thoracic Branch Endoprosthesis (TBE) in action
- Participate in hands-on and simulation workshops
- Network with your peers
- Gain insights from leading experts in the field

Together, improving life

Tuesday, March 26, 2024
